Team Name: TBD

Team Members:
Rohit Vakkalagadda (rv324@cornell.edu)
Kaitlyn Lu (kl995@cornell.edu)
Lucas He (th689@cornell.edu)
Project Manager: Andy He

What, if any, insights did you get from your PM meeting?
We were introduced to the idea of an embedding model (if A wins over B often, and C is similar to A, then B vs. C would be easy to determine the winner of).

What challenges arose this week?
Our biggest challenge was switching datasets, as our previous dataset was nigh useless and difficult to work with.

What went well?
Front-end development went very smoothly as Streamlit proved easy to use.

For each member: what were your main takeaways from the "breaking assumptions" exercise?
Lucas: My main takeaway is that this exercise laid the foundation to build stronger connections.
Kaitlyn: My takeaway was that there was a lot that I had not known about my teammates.
[Rohit was absent for the exercise]

For the group: what, if anything, will the group take away from "breaking assumptions"?
N/A
